

Vehicles on Display on the Exhibit Floor – Toronto Enercare Centre

The following rules apply to all gasoline or diesel powered equipment:

1. Motor vehicles or gasoline-powered equipment on display must be equipped with “lock-on” type gasoline tank caps. The electrical system shall be de-energised by either removing the battery or disconnecting both battery leads and covering them with electrical tape or another electrically insulating material. Fuel tanks must be filled as close to the $\frac{3}{4}$ mark as is possible (to prevent vaporisation and also allow for thermal expansion of the contents). Vehicles unable to be equipped with lock-on type caps must have caps sealed in a manner approved by Exhibition Place Safety Engineering Department.

Running of vehicles on display is prohibited without prior approval from Exhibition Place and the Fire Department. Vehicles required to be run as part of a performance or contest must be refuelled outdoors from approved safety containers.

3. Garden tractors, chain saws, power plants and other gasoline-powered equipment shall not contain any fuel and shall not be used for demonstrations without permission by Exhibition Place.

3.2.2.6 Propane or Natural Gas Fuelled Equipment/Vehicles
Fuel tanks on propane or natural gas fuelled vehicles or equipment must be empty. Similarly, cylinders for barbecues and /or appliances within any vehicle, camper, mobile home, etc. must be empty.
